**YOU CAN'T SEE WHAT'S MISSING,  
BUT YOU WILL FEEL IT.**

A **Honeywell Zoning System** means whole-house comfort for your new or existing home.

Make your **exceptional home**  
**exceptionally comfortable.**

*“Trying to heat and cool your home with a single thermostat is like trying to light your house with just one lamp.”*

**Y**ou’ve worked hard to make your house an attractive, inviting home. And spent hours just deciding whether to paint your living room “sage” or “celadon” green. So take a few minutes to consider the one thing that’s basic to a quality home life: comfortable living conditions. In every room of the house.

With a Honeywell Zoning System, you’ll no longer need to constantly readjust your thermostat or registers for consistently comfortable rooms. You can set the temperatures you want—when you want and where you want. And since you won’t be wasting heated or cooled air on rooms that don’t need it, you can save up to 30% in heating and cooling costs when used with a programmable thermostat.

Every home has at least two zones; the living area and sleeping area, which are seldom used at the same time. Others are typically divided between upstairs and downstairs; master and kid’s bedrooms, formal living room, dining room, family room and kitchen. Each area is often occupied at different times and has different heating and cooling loads. The result with Zoning is total comfort, no matter where you are inside your home.

**Energy Savings You Can Bank On!**

When combined with programmable thermostats, Zoning allows you to conserve energy, up to 30% which can add up to hundreds of dollars in savings per year.\*

**How Does Zoning Work?**

Each zone in your home has dampers in your ductwork that open or shut based on your heating/cooling requirements. These dampers are controlled through the thermostat for that particular zone. When you don’t need to condition the air, you save energy because the dampers close the ductwork in that zone of your house.

**THE BENEFITS OF ZONING...**

**COMFORT**

- Solves the problem of rooms that are too cold or too hot.
- Allows you to set the temperature you want when you want it, and where you want it.

**CONSERVATION**

- Only condition occupied zones
- Save up to 30% when combined with programmable thermostats

**CONVENIENCE**

- Flexibility of a thermostat in each zone
- No need to return to the dining room to adjust the thermostat for the whole house

**COMMON SENSE**

- Why not control your heating and air conditioning like you control your lights?

If you combine your system with automatic setback thermostats, you’ll increase your efficiency and comfort because you can program each thermostat to automatically provide different temperatures during various times of the day. This truly provides the temperature you want... where you want it... when you want it!

**Zoning Pays for Itself in Energy Savings:**

Annual Fuel Cost	Savings In 1 Year	5 Years	10 Years
\$1000	\$ 300	\$1500	\$3000
\$1250	\$ 375	\$1875	\$3750
\$1500	\$ 450	\$2250	\$4500
\$2000	\$ 600	\$3000	\$6000
\$2400	\$ 720	\$3600	\$7200

For demonstration purposes only, individual results may vary.

\*When compared to a central thermostat, no setback.
